

# UTM-IMM 1-Day Symposium On Materials Processing, Inspection And Testing (MPIT 2017)

**Theme: Technology Solutions for Quality Improvement**

Thursday 24 August 2017, Puteri Pacific Hotel, Johor Baru

**Materials Processing, Inspection, and Testing** have contributed immensely to research and applications, especially in quality control, material selection, and sustainability, as well as materials applications as a whole. The advancement of knowledge in this area has also benefited much from these techniques. The recent advancement of technology that produces quick results with high precision analysis has gained much interest among practitioners. These improvements have greatly widened materials applications in many new and diversified fields. However, in Industry, there continue to be many materials failures due to deficiencies in the overall process of Quality Assurance. Industry need more novel solutions. This symposium will share problems and deficiencies, and the need for improvements plus introduction of some novel ideas and potential solutions to the problems faced by industry for the past decades. Thus, it is timely to have this symposium to share current technology developments in inspection and testing of materials plus discuss potential innovative and novel solutions.

## OBJECTIVES

This symposium is organized with objectives to provide:

- ✓ An international level platform to all individuals and organizations, involved and interested in the materials inspection and testing to share their views and experiences.
- ✓ A direct forum for exchanging knowledge, ideas, new techniques/equipment and findings among the academia and industry players.
- ✓ An opportunity to create networking and collaboration between the academia and industry players.
